

OFFICIAL PUBLIC AWARENESS NOTICE

Issued by: Chemical Valley

To:

All Clients, Customers, Partners, and the General Public

Subject: Public Advisory Regarding a Fake & Fictional Chemical Product Circulating Online

Chemical Valley would like to inform the public, our valued clients, and customers about a product that has recently become **viral on YouTube and other online platforms**, commonly referred to as:

“Caluanie Muelear Oxide”

Official Clarification

Due to a significant increase in demand inquiries for this so-called compound across Pakistan, Asia, and the United States, Chemical Valley conducted a thorough and responsible investigation as part of our professional and ethical duty.

As a company operating in both America and Pakistan, dealing strictly in pharma-grade and lab-grade chemicals, we verified this product through international chemical databases, industry references, ICCA (International Council of Chemical Associations), and direct verification attempts with claimed suppliers and sources.

Investigation Findings

After complete verification, Chemical Valley officially confirms that:

- This compound does NOT have any CAS number
- No MSDS or SDS exists
- No legitimate manufacturer is registered
- No scientific, pharmaceutical, laboratory, or industrial recognition exists

To eliminate any doubt, Chemical Valley also purchased a limited quantity strictly for trial and verification purposes. The result was conclusive:

This is a fake, fictional, and non-existent chemical.

Public Warning

We strongly advise the public and businesses to NOT buy or sell this product, NOT send advance payments to any supplier, and NOT rely on YouTube videos, WhatsApp messages, or unofficial sources.

Chemical Valley's Commitment

Chemical Valley operates with integrity, transparency, and responsibility. We deal exclusively in pharmaceutical-grade and laboratory-grade chemicals that are verified, documented, and legally recognized. Protecting public safety and industry trust is our responsibility.
